***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-15, drawn to bandwidth allocation, classified in class 370, subclass 428.

II. Claims 16-24, drawn to monitoring bandwidth consumption, classified in 370, subclass 232.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP & 806.04, MPEP & 808.01). In the instant case the different inventions I and II have different functions and different effects.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Applicant is required to elect either with traverse or without traverse.
